Congratulations on your purchase of the Markbass MB Octaver.

We are very proud of the high quality standard that we're able to offer thanks to our 100% Made in Italy production, state-of the-art testing and quality control facilities, and top-quality components.

This manual will help you get the most out of your MB Octaver pedal. If you have any questions after reading it, we invite you to contact us anytime with your comments and questions at: info@markbass.it.

Thank you again, and enjoy your MB Octaver!

3. INTRODUCTION

The MB Octaver gives you a great range of ultra-funky sounds—and it's dead simple to use.

The pedal features separate level controls for each octave and dry sound so you can add thickness to your sound by mixing in doubles of your playing pitched one and/or two octaves down. This analog stompbox always sounds musical.

The low notes are clear and perfectly in tune, the sound is super clean, and the tracking is super fast.

Like all our pedals, this unit features "true bypass": that means that when the Octaver is 'off', your signal goes directly from the input jack to the output jack with no degradation of audio quality.

Start by running a cable from your bass to the MB Octaver input jack, and run another cable from the pedal output to your amp, setting all the pedal's controls to the counter-clockwise position. Turn the effect on by stepping on the footswitch, and dial in whatever mix of Dry, Octave 1 and Octave 2 signals you wish by adjusting the level knobs.

4. FUNCTION OVERVIEW

OCT 1 (1) - adjusts the volume level of your signal pitched one octave down

OCT 2 (2) - adjusts the volume level of your signal pitched two octaves down

DRY (3) - controls the volume level of your dry sound

ON/OFF SWITCH* (4) - turns the effect on and off: the LED indicator illuminates when the effect is on.

*TRUE BYPASS - When the pedal's controls are 'off', your signal goes directly from the input jack to the output jack with no degradation of audio quality.

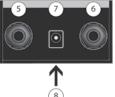

5. CONNECTIONS

1/4" INPUT JACK (5) - (CONNECTS TO YOUR INSTRUMENT) As with any pedal, make sure your amp is off and the volume is turned down before making connections.

1/4" OUTPUT JACK (6) (CONNECTS TO YOUR AMPLIFIER)

DC IN (7) - External power supply connection (9-12V DC PSU).

STANDARD 9V BATTERY COMPARTMENT (8) - Use a Phillips screwdriver to unscrew the two screws to access the 9V battery compartment on the bottom side of the pedal.

LIMITED WARRANTY

Markbass offers an international limited warranty on Markbass products purchased from any authorized Markbass dealer, effective from the day of purchase. The terms of this warranty vary from country to country; please contact the Markbass distributor in your country for details.

Please register this product online at www.markbass.it to establish the date of purchase. However, please note that you are required to retain a copy of your receipt as proof of purchase in order to receive warranty service.

This warranty does not apply to any damage to the product caused by misuse, mishandling, accident, abuse, alteration, modification or unauthorized repairs. Product appearance and normal wear and tear (worn paint, scratches, etc.) are not covered by this warranty. Markbass reserves the right to be the sole arbiter regarding the misuse or abuse of this product. Markbass assumes no liability for any incidental or consequential damages, which may result from the failure of this product. Any warranties implied in fact or by law are limited to the duration of this express limited warranty. Your legal rights related to the warranty will vary depending on the country of purchase.

WARRANTY CARD
